

„SKOR“ - Storage shelves

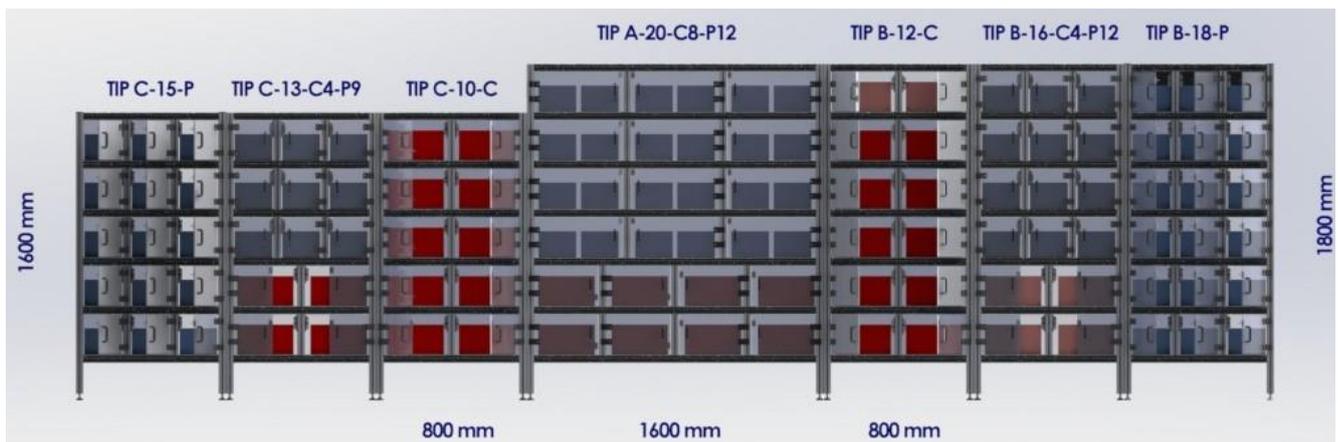

stock control and management with records and access control

- Warehouse without warehouseman
- Authorized access to warehouse goods, regardless of time and shift
- Arranged and recorded warehouse status of valuable goods and equipment
- Records and analysis of consumption by time and place of cost
- Purchasing organization of critical equipment for production and maintenance
- Secure and complete documentation of the issuance and receipt of goods

Product description: Goods dispensing system, divided into compartments, equipped with doors with locks and door closing control. It is used for storage of valuable equipment, quantity control and protection against theft with a guarantee of safe and complete documentation of the issuance of goods. Each compartment can contain several types of goods.

Cabinets are made of anodized aluminum profiles with partitions and sides made of transparent polycarbonate. The doors are made of plexiglass, and the shelves are made of opaque-opal polycarbonate. Transparent doors and partitions ensure visibility inside each compartment.

The computer is used for registration and deregistration of employees, as well as entry and dispensing of goods from the rack. Records of goods within the rack enable monitoring and care of ordering the necessary goods.

We present several types; whose characteristics are in the table.

Cabinet type	Dimensions (width x depth x height)	Nr. of larger compartments	Nr. of smaller compartments
TYPE A-20-C8-P12	1580x400x1800mm	8	12 x 2
TYPE A-32-C8-P24	1580x400x1800mm	8	24
TYPE B-16-C4-P12	800x400x1800mm	4	12
TYPE B-12-C	800x400x1800mm	12	-
TYPE B-18-P	800x400x1800mm	-	18
TYPE C-10-C	800x400x1540mm	10	-
TYPE C-13-C4-P9	800x400x1540mm	4	9
TYPE C-15-P	800x400x1540mm	-	15
TYPE C-12-C4-P8	800x400x1540mm	4	8

Job description: By logging in via card or password, approved "cards / employees" are given access to individual compartment. The database by compartments records every entry or dispensing of the goods. Goods can be recorded via a "barcode" reader, with an additional description of the type of goods, the manufacturer and an explanation. When dispensing goods, you need to enter the record number or "barcode" of the goods, the quantity and location of the cost at which the goods are dispensed. After closing the door, the compartment is locked, if the door remains open, the system reports it and declares the error.

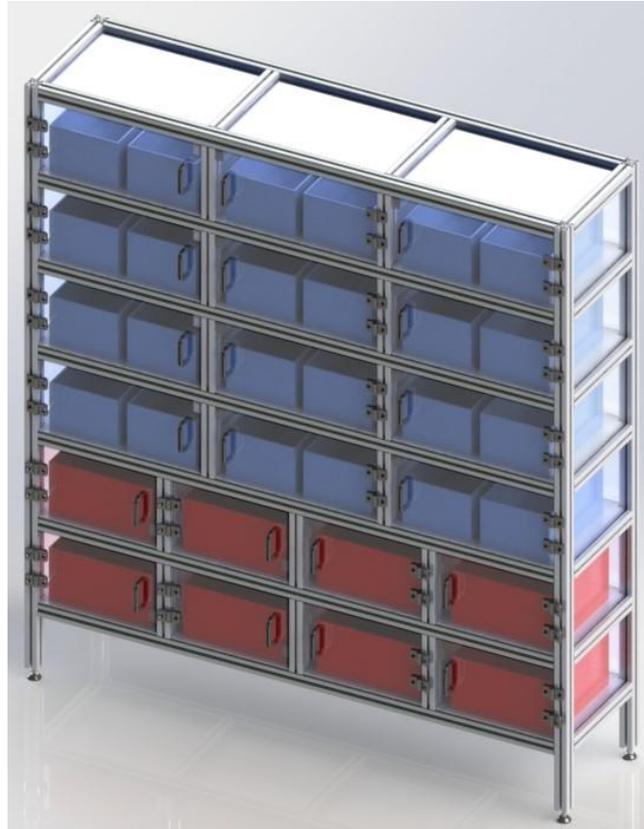

A combination of solutions: The shelves can be combined and expanded according to the needs of the user. This means choosing a shelf as desired and stacking it in a row. The program allows the expansion of several cabinets together, which makes the storage space adequate for the quantity of goods.

Software solution: Management, dispensing and storage the goods with intuitive handling and easy administration. Quick, easy and efficient management of dispensing and receiving the goods in the storage closet. Search of item database by code, manufacturer or text. Easy and fast finding of the item and the compartment where it is located. Fast user login using a PIN or RFID reader. Standard tools for analyzing consumption by time,

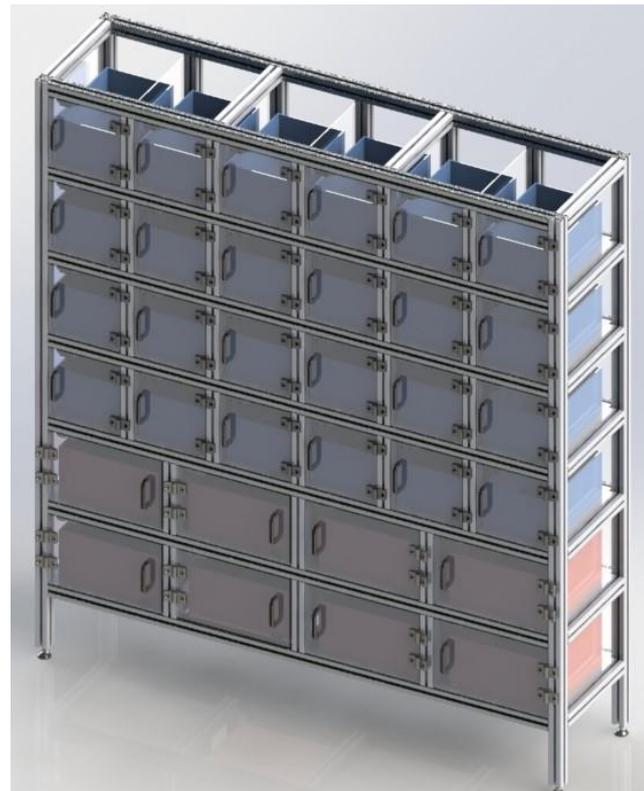

cost center or item. Option to enter the minimum and maximum quantities for critical items, in order to appear in the records of goods to be ordered. Print reports and spreadsheets on a printer or send by email.
